

# Changes for RailTopoModel version 1.2 (as required by railML version 3.1)

- ① adding new attributes  
 @lateralOffsetSide : left, right  
 @verticalOffsetSide : above, under
- ② removing redundant reference to PositioningSystem
- ③ changing implementation of validity times to allow for multiple validity times
- ④ adding attribute  
 @length : double
- ⑤ renaming of intrinsic coordinates
- ⑥ changing implementation of names to allow for multiple names
